

# Productivity Through Innovation

## About Us

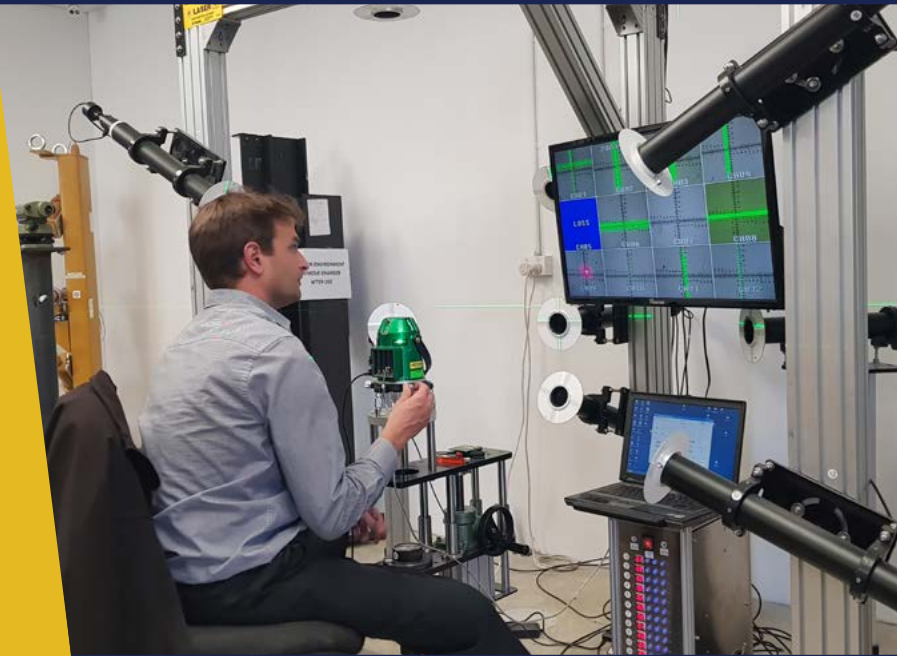

Cody Corporation has been serving the Construction, Civil & Surveying markets for over 30 years. We provide quality Sales, Hire, Service and Rental of Construction Lasers, Surveying Equipment, Machine Guidance Solutions and Weighing Equipment to our vast customer base Australia wide.

With our extensive experience serving the Civil, Construction and Surveying fields we guarantee our Services, Products, Training and Support will exceed your expectations.

We combine expertise within these fields to provide a Spatial Correction Service in conjunction with Geoscience Australia to the Australian market, this is called Cody RTK.

With 99% Australia wide coverage at affordable prices you will have a service you can rely upon for your correction needs.

Being uniquely independent with a solid focus on customer solutions, we source globally to supply nationally and locally.

## Our Mission Statement

*“To provide innovative solutions, product and service which exceeds customer requirements and expectations.*

*This is achieved via consultation and sourcing the best solution matched specifically to customer requirements with ongoing unparalleled customer support.”*

## Survey

Cody Corporation has an extensive range of Surveying Equipment. From Robotic Total Stations, GNSS Receivers, Surveying Prisms as well as Accessories and adaptors required. We supply trusted quality products we can support for years to come. With an ability to source solutions globally, and a constantly updating product line, ensuring we are leaders in the industry.

## Machine control

2D & 3D Machine Control systems are of paramount importance within the Civil & Construction industries. The benefit of machine control is to increase productivity, accuracy and efficiency. Due to Cody Corporation being truly independent we have a full range of systems best suited to your application. We provide full training, installation, service and ongoing support.

## Construction

We stock an extensive range of Rotary and Line Lasers on the market. Being truly independent enables us to source from multiple brands, meaning you can be sure you will have the specific tool for your job. With our Service Centre behind your purchase, you can be sure your equipment will always be serviced, maintained and calibrated for when you need it most.

## Workshop

We have leading-edge equipment to Calibrate any brand Laser on the market, with South Australia's only Hendecagon Optical Tunnel. Our experienced workshop and Field Service Technicians have over 25 years' experience and are fully qualified as the authorised Service Centre for an extensive range of brands.

## Support

Cody Corporation has over 30 years' experience within the Construction, Civil and Survey industry. With absolute confidence no matter the job, we have a solution to complete your task, and provide exceptional follow up service, repairs and ongoing support of your equipment even after the job's completion.

## Training

Cody Corporation has an extensive range of Automated Weighing Equipment which has been quality tested and is industry trusted.

With a global network, Cody Corporation provides complete Automated Weighing Systems solutions, with Sales, installation, Calibration and ongoing Quality Support for any range of machinery.

## Cody RTK

Real-Time Kinematic (RTK) surveying using Global Navigation Satellite Systems (GNSS) is now a common method used within the industry. CodyRTK provides a complete satellite positioning coverage of 99% Australia Wide, catering for all your RTK needs. With our Technical Support team, working in collaboration with Geoscience Australia, to best support you.

## Pipe Inspection & Location

Whether it's underground cable, pipe or asset location, Cody Corporation has the right Avoidance & Location tools for the job. We only supply leading brands trusted within the industry and provide Support & Calibration Services to back up your purchase. Cody Corporation also has a vast range of Underground Pipe Inspection Tools. From Domestic to Commercial Push Rod Systems and high end Robotic Pipe Inspection Crawlers we can guarantee you will have the right tools and training for your job.
