**Compuload**  
*On Board Weighing Systems*

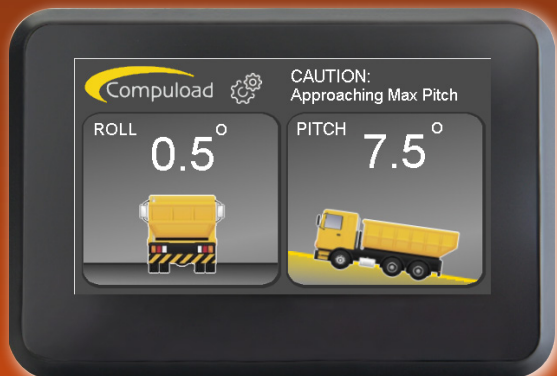

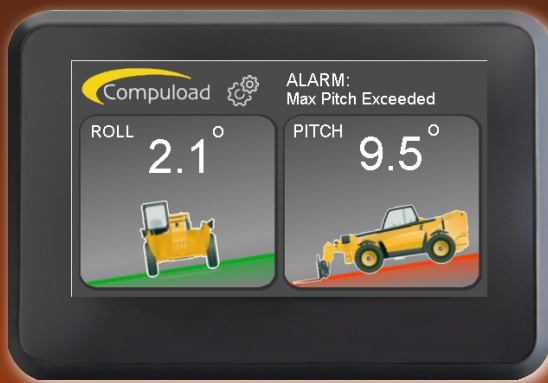

### System Overview

Designed for the harshest of environments, the Compuload Dual Axis machine level indicator, features a tough 4.3" Colour Display with touchscreen and intergrated buzzer. The robust CANBUS Dual axis accelerometer is vibration and shock tested to EN60068-2-6 and EN60068-2-27 standards (25G at 6 m/s) and is IP66 Rated with an accuracy of +/- 0.3 degrees.

# Tilt Sensor Indicator

## System Overview

When max angle threshold is reached, icons change colour and flash whilst the audible alarm is activated to notify the operator of the dangerous condition.

Dual Axis CANBUS Sensor,  
Pitch and Roll -  
to be mounted on truck

Compuload is the trusted name in On Board Weighing. Established in 1988 we are privately owned Australian company who design, manufacture and distribute the quality Compuload On Board Weighing products throughout Australia and Export markets. Our aim is to offer quality products, dependable performance, reliable delivery and technical back up for all your weighing requirements.
